Header

NAME LINKS TO OTHER PAGES+RESUME

Simple Header, colors are distinct from the rest of the page.

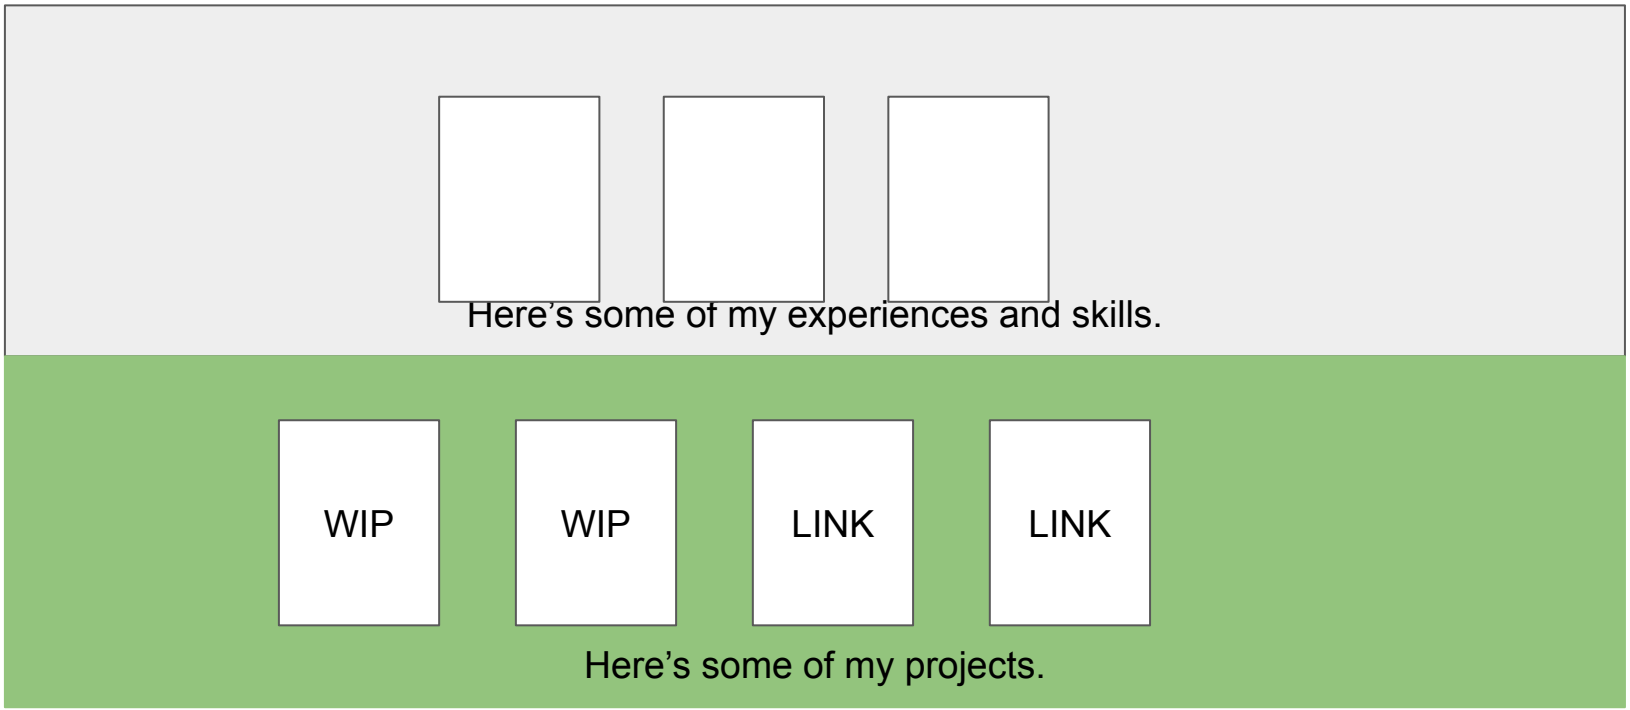
Home Page

Acts as a general introduction, and more on the green part underneath

Call to Action, Checkout the website but consider who I am, my head as an image here gives who I am. I know it does the same as the header, but the middle is where the viewer is expected to look first. It's not needed to be followed on other pages because they're expected to care enough to scroll to the end.

About Section pretty much, it's redundant to make too many pages.

Skills



Here’s some of my experiences and skills.
